THE PROS' EQUIPMENT

Tasmanian Tiger. We equip the professionals.

Tasmanian Tiger enjoys an excellent reputation among the armed forces and police forces and is also highly regarded internationally. It is not for nothing that we have been developing our products consistently for more than 20 years together with specialists, whose experience from use flows into every new development and every optimization of an article.

The core competence of Tasmanian Tiger has always included technically mature backpacks with extremely powerful carrying systems for different areas of use - at the latest with the 2021 collection but also the modularity of the product range, which we have consistently developed further for several years.

The **TT Modular Gunners Pack** is a completely new development of a small, extremely flexible deployment backpack that leaves nothing to be desired in terms of modularity. With the **TT Modular Trooper Pack** and the **TT Modular Combat Pack**, we are introducing two proven combat backpacks in a revised, modular version. In addition to a smooth, tidy look and optimized equipment, both continue to impress with their outstanding wearing comfort.

We are expanding our tactical bag range in 2021 with the new **TT Tac Pouch line 1.1 to 7.1**. It consists of five pockets for basic tactical use.

The **TT Tac Pouch 14**, a large, flat compressible accessory pouch, is specially designed for use on plate carriers, as is the **TT Bladder Pouch Extended**, a volumetric bladder pouch.

With the **TT Modular Support Bag**, we are adding a rectangular, padded Medic bag to our successful Medic line that can be used on plate carriers, rucksacks and in tactical vehicles.

The 2021 range is rounded off by light, flexible harnesses, various belts, a variably usable weapon sling and modular accessories.

No matter what comes in 2021 - we have the right equipment for you.

NIGHT CAMOUFLAGE

THE TT PRODUCT RANGE EQUIPPED WITH IRR PROTECTION

CORDURA® &
INFRA-RED
REFLECTANCE

Tasmanian Tiger manufactures tactical equipment of the highest level and addresses the security issue of camouflage, under the observation of night vision devices, with an extensive product range.

Chest rigs and plate carriers, mission and medic backpacks as well as magazine pouches, tactical pouches and daypacks are offered in the color **stone grey olive with certified IRR treatment**.

Both the European CORDURA® materials as well as webbing, hook-and-loop fasteners and buckles meet the high German Bundeswehr standards TL 8305-0278 and TL 8305-0281 with regard to the IRR camouflage effect (IRR 650 - 1250nm / 10 - 42%).

BACKPACKS

X1 SYSTEM

The size-adjustable high-end X1 Carrying System was specially developed for high loads over 40 kg. Particular attention was paid to the adjustability, ergonomics and ventilation of the system. Durable materials, multi-layered structures and reinforcements in the right places make the system stable and durable.

Two ergonomically shaped, crossed aluminium bars (1) lead laterally into the hip belt (2) transferring the load from the back to the hips. The anatomically fitting hip belt consists of multi-layered hip fins with PE reinforcement plates. It can be easily adjusted and tightened by the deflected belt strap (3). A rubberised lumbar pad (4) prevents the backpack from slipping and an anatomically shaped aluminium rod (5) helps to optimize the fit. The back padding (6) above it is ultra-concave in shape, sewn into chambers for better ventilation, and rests perfectly against the back with its generous technical padding. The load control straps (7) can be partially attached in two different positions for optimum setting. Ergonomically shaped shoulder straps (8) with height adjustment (9) increase the level of comfort. The lid is also height adjustable (10).

V2 SYSTEM

The size-adjustable V2 Carrying System was developed for medium to high loads up to 40 kg. A combination of aluminum and fiberglass bars results in an excellent balance of efficiency and flexibility in load transmission with low own weight. Channels on the back padding ensure good air circulation.

Two to a "V" arranged aluminum bars (1) and two load-transmitting fiberglass bars (2), which lead laterally into the hip belt (3), form the central static unit. The three-part, ergonomic hip belt consists of a lumbar pad (4) with rubberized insert against slipping of the backpack as well as two conical cut, multi-layered hip wings with a PE-plate reinforcement. The hip belt can be easily tightened and adjusted by means of the deflected belt strap (5). The back padding (6) has a concave shape and is sewn into chambers for better ventilation. It has good contact with the backpack. The load control belts (7) can be fastened in two different positions and thus allow an exact adjustment. Comfortable shoulder straps (8) with the possibility of height adjustment (9) complete the wearing comfort. The lid is height adjustable (10).

TASMANIAN TIGER - COMPETENCE IN CARRYING

Tasmanian Tiger has a long-standing experience in backpack construction and proven expertise in high-performance backpack carrying systems.

When developing our backpacks, we place great value on ergonomic design, durable materials, functionality, and a perfect fit. For long journeys with a heavy load, the most important thing is the comfort of the backpack. That is why, in addition to the selection of the right pack sack, the selection of the right carrying system plays a central role.

The heart of a Tasmanian Tiger carrying system revolves around an internal frame structure that transfers the weight of the pack sack to the hip muscles via the hip belt. This transfer assures that pressure is relieved from the shoulders and spine. It is a basic fundamental that the heavier the load the more stable the support system must be.

However, the load transmission should not be completely stiff, but must remain flexible enough to ensure that even in rough terrain, the carrier can be agile in his/her movements, especially when traversing large obstacles. For the load transfer to work optimally, the carrying system must also function for various sized individuals. To ensure this, the Tasmanian Tiger carrying systems are adjustable in size and can be custom fit to a wide range of back lengths.

Because a backpack not only has to fit the application, its respective requirements, and the carrier, we have developed different carrying systems for different backpack models, shown on this page.

Tasmanian Tiger – Carrying Systems for every mission.

V2 PLUS SYSTEM

The size-adjustable V2 Plus Carrying System was developed for medium to high loads up to 40 kg. Backpacks with this system offer great adjustability of the back length and can be worn through the detachable hip belt even with fully loaded vests and chest rigs.

Two V-shaped aluminium rods (1) guide the force directly into the reinforced hip strap. The three-part ergonomically shaped hip strap consists of a lumbar pad with a rubberised insert (2) to prevent the backpack from slipping, and two conically shaped hip wings (3). The hip belt, which runs under the lumbar pad, can be removed, if necessary. The hip wings have several layers of padding and are reinforced with a PE plate. The hip strap is easy to tighten using the deflected belt strap (4). The back padding (5) is concave and sewn into chambers to provide pleasant ventilation. The height of the wide, ergonomically shaped shoulder straps is adjustable (6), and together with the load control straps (7), they ensure a close, firm fit of the backpack.

X VENT ZERO PLUS SYSTEM

The X Vent Zero Plus Carrying System combines excellent ventilation with excellent fit and low weight. The tension of the system can be used to regulate the distance from the pack to the back, right up to force fit carrying.

Two fiberglass rods are attached in an X-shape (1) to the back of the pack and provide, together with the integrated hip belt, the supporting structure of the pack (2). Two additional fiberglass rods (3) transfer the load to the anatomically shaped, ventilated hip belt (4). The open space created by the supporting structure (5) results in an extremely large ventilation zone. The system allows for the tension of the X-shaped fiberglass rods to be adjusted (6), which varies the distance of the load to the back – changing also the center of gravity of the load.

TT RANGE PACK MK II

Item number: 7605
Color: 331 olive, 346 coyote brown
Size / Volume: 84 x 35 x 27 cm / 90 l + 10 l
Weight: 4,40 kg (without detachable pockets 3,50 kg)
Material: CORDURA® 700 den

Modular, large capacity backpack for individual combatants on mission for several weeks. The front pocket of the rucksack can be detached and used as a daypack, the side pockets are the same as the TT Tac Pouch 8 SP (item 7773) and can be used on any appropriately designed MOLLE panel.

[1] X1 Carrying System [2] Packsack with snow guard [3] Divided main and bottom compartments [4] Fixation for hiking poles or ice axes [5] Height adjustable chest belt [6] Side compression straps [7] Compression around perimeter of base [8] Detachable lid with 3 zip pockets (2 x outside, 1 x inside) [9] Two ports for drinking tubes on the lid [10] Hydration system compatible [11] Additional detachable side pockets (each 5 l, 7773 TT Tac Pouch 8 SP) [12] Front pocket unzips for use as a daypack (7 l) [13] Weight of main backpack including front- and side pockets = 4,40 kg // Weight of main backpack without front- and side pockets = 3,50 kg [14] MOLLE system on the sides

TT PATHFINDER MK II

Item number: 7622
Color: 331 olive, 346 coyote brown
Size / Volume: 84 x 35 x 22 cm / 80 l
Weight: 3,25 kg
Material: CORDURA® 700 den

Fully-fledged combat backpack for several days in the field. Large, variable volume compression flap on the front for helmets etc. The MOLLE system on the sides is used to attach additional pockets.

- [1] V2 Carrying System [2] Packsack with snow guard [3] Removable section between main and bottom compartment [4] Fixation for hiking poles or ice axes [5] Height adjustable chest belt [6] Side compression straps [7] Compression around perimeter of base [8] Variable volume compression flap e.g. to attach a helmet [9] Handle on front and back [10] Detachable lid, divided into 3 [11] Two ports for drinking tubes on the lid [12] Rain cover [13] Hydration system compatible [14] Side pockets [15] MOLLE system on all the important attachment areas

TT FIELD PACK MK II

Item number: 7963
Color: 331 olive, 346 coyote brown
Size / Volume: 73 x 32 x 21 cm / 75 l
Weight: 2,65 kg
Material: CORDURA® 700 den

Universal combat backpack with a total capacity of 75 liters. The TT Fieldpack MK II is designed for transport of up to approx. 40 kilograms. Main and bottom compartment can be divided for separate storage of wet or dirty clothing, etc. MOLLE on the front and on the sides serves the individual extension. The V2 Carrying System, which can be adjusted to your own back length, combines a low weight in relation to the size with outstanding flexibility and efficient load transfer

- [1] V2 Carrying System [2] Packsack with snow guard [3] Removable section between main and bottom compartment [4] Height adjustable chest belt [5] Compression straps on sides [6] Handle on front and back [7] Height adjustable lid with zip compartment [8] Hydration system compatible [9] Port for antenna [10] MOLLE system for optional attachment of additional pouches [11] 7572 TT Tac Pouch 9 SP can be used for example as a side pocket [12] 7573 TT Tac Pouch 10 can be used for example as a lid pocket

TT MODULAR TROOPER PACK

Item number: 7263
Color: 040 black, 331 olive, 346 coyote brown, 343 khaki
Size / Volume: 62 x 34 x 19 cm
Weight: 2,75 kg
Material: CORDURA® 700 den

Universal military backpack with two attachable pockets and the V2 Plus Carrying System. Based on the predecessor model, the TT Trooper Pack offers an optimized arrangement and new functional features. The main compartment opens completely, and the special zipper guides make it possible to use the pack as a top loader. The back panels of the front and main compartments feature MOLLE hook-and-loop for customized loading, and both front pockets have zipper mesh pouches to organize your gear. Laser-cut MOLLE on the front and sides allow you to add pouches or extra gear as you see fit. The backpack has an integrated rain cover and a removable hip belt that can also be used as a Warrior Belt. The back panel can be adjusted to different back lengths.

The items are equipped with the same features. Item 7264 is made of Cordura® 500 den.

TT RAID PACK MK III

Item number: 7711
Color: 040 black, 331 olive, 346 coyote brown
Size / Volume: 65 x 32 x 24 cm / 52 l (48 l + 2x 2 l)
Weight: 2,90 kg
Material: CORDURA® 700 den

Classic military backpack with a total capacity of 52 liters and V2 Plus Carrying System. The TT Raid Pack MK III has a main compartment with a volume of 48 liters and two fixed side pockets with a volume of 2 liters each. MOLLE on the front, the lid, the side pockets and on the hip belt allows individual extension. The V2 Plus Carrying System of the backpack is designed for a weight of up to approx. 40 kilograms and offers great variability when adjusting the back length. Due to the removable hip belt, the backpack can also be carried with fully equipped chest rigs and vests. The hip belt can be used separately as a Warrior Belt. ▶

Light, tactical deployment backpack for modular use. The materials used for this deployment backpack are very light, making it super easy to handle. It has a flat main compartment that is hydration system compatible and the back panel is fitted with MOLLE hook-and-loop for customizable loading of your gear. The upper front pocket of the backpack is a flip-top behind which you can attach a magazine holder (three M4 magazines or 4 pistol / MP7 magazines, included with purchase). Both middle front pockets are removable and behind each is a MOLLE hook-and-loop surface. Both the TT Tac Pouch 12 (Item 7862) or the TT 2 SGL Backup Mag Pouch M4 (Item 7811) can be attached to the lower front pocket. The backpack has a MOLLE reverse system on the back so you can integrate it into a plate carrier. You can also use an included adapter to attach it to plate carriers.

TT MODULAR 30 CAMERA PACK

Item number: 7192
Color: 040 black, 331 olive, 346 coyote brown
Size / Volume: 58 x 28 x 19 cm / 30 l
Weight: 2,40 kg
Material: CORDURA® 700 den

Modular backpack conceived as a camera and documentation pack. The focus here is on comfort and usability. The main compartment features front access and an extra top opening so you can quickly grab your camera. The interior of the backpack has adjustable partitions for cameras and lenses; the partitions can of course be removed completely. A little organizer pocket for memory cards and filters can also be removed. The backpack has a lid pocket and deep side pockets that are meant to hold a tripod and can be secured with lateral compression straps. Laser-cut MOLLE on the sides and front can be used to add gear as you see fit. The padded back panel system, which includes the padded hip belt, makes the backpack super comfortable to carry. The hip belt with laser-cut MOLLE can also be used to attach accessories, for example lens pouches, and can be removed at any time. The shoulder strap also has a camera fastener. The rain cover in the bottom pouch of the backpack completes the list of features. ►

Material: CORDURA® 700 den

Inconspicuous daypack with modular options. The TT Urban Tac Pack 22 has an inconspicuous look to it so it's perfect for civilian use. The completely removable main compartment features MOLLE hook-and-loop so it can be modularly arranged. The transparent mesh zipper pouches in the main compartment and a front pocket with side access gives you even more organizational options. The daypack also has a removable hip belt.

[1] Height adjustable chest belt [2] Removable hip webbing [3] Side compression on the inside [4] Handle [5] Flat mesh pockets inside [6] Front compartment with zipper [7] Large MOLLE hook-and-loop patch inside [8] Removable bungee cord compression

TT MODULAR 30 CAMERA PACK

Item number: 7192
Color: 040 black, 331 olive, 346 coyote brown
Size: 58 x 28 x 19 cm / 30 l
Weight: 2,40 kg
Material: CORDURA® 700 den

Modular backpack conceived as a camera and documentation pack. The focus here is on comfort and usability. The main compartment features front access and an extra top opening so you can quickly grab your camera. The interior of the backpack has adjustable partitions for cameras and lenses; the partitions can of course be removed completely. A little organizer pocket for memory cards and filters can also be removed. The backpack has a lid pocket and deep side pockets that are meant to hold a tripod and can be secured with lateral compression straps. Laser-cut MOLLE on the sides and front can be used to add gear as you see fit. The padded back panel system, which includes the padded hip belt, makes the backpack super comfortable to carry. The hip belt with laser-cut MOLLE can also be used to attach accessories, for example lens pouches, and can be removed at any time. The shoulder strap also has a

TT MODULAR 30 CAMERA PACK IRR

Item number: 7054

TT MULTIPURPOSE SLING

Item number: 7105
Color: 040 black, 331 olive, 346 coyote brown
Size: 150 x 5,5 cm
Weight: 185 g (set)
Material: Nylon Webbing

Padded carrying strap with various carrying and attachment options. Quick fasteners allow you to mount either a gun hook, a webbing for sling swivels or a 3 mm cord for cameras (with 2 strings of 3 mm diameter each). The maximum load for the 3 mm cord is 85 kilograms, and it should be replaced when the inner white core becomes visible. [1] Length adjustable [2] Padded neck / shoulder strap [3] Made from 25 mm webbing [4] Interchangeable ends: Rifle Hook, Camera Sling (3mm) or webbing for sling swivels

NEW

TT CAMERA HARNESS HOLSTER

Item number: 7239
Color: 040 black, 331 olive
Size: 16 x 9 x 9 cm
Weight: 90 g
Material: Polyester Webbing

Practical camera holster for attachment to backpack shoulder straps, suitable for many backpack models. The adjustable holder (up to approx. 9.5 cm lens diameter) fixes the ready-to-use camera for immediate access and thus relieves the neck. The attachment to the shoulder strap via webbing and hook-and-loop closure. The neck strap of the camera must be used as an additional backup. To maintain the balance, a lens length of at least 8 cm is recommended, but this depends on the camera weight. [1] Hook-and-loop closure [2] To be used on shoulder straps [3] To secure a loop or a D-ring on the shoulder belt is needed

TT MODULAR LENS BAG VL INSERT M

Item number: 7196
Color: 040 black, 043 carbon, 331 olive
Size: 17 x 10 x 10 cm
Weight: 130 g

Size: Unisex
Weight: 720 g
Material: CORDURA® 700 den

Length- and width-adjustable tactical MOLLE vest with slot compartments for ballistic panels on the inside. The waistcoat is easy to put on and take off, and has a wide range of variable attachment options. If required, it can be fitted with ballistic SAPI panels (30 x 25 cm).

[1] Length-adjustable rubberised padded shoulder section left and right
 [2] Zip compartment on the front [3] Front zip [4] Length of side sections adjustable [5] Front in mesh material [6] Front with fold-away compartment for armor plates [7] Insert for armor plate on back [8] MOLLE system for additional equipment [9] MOLLE system on the backside

TT SECRET CUMMERBUND

Item number: 7134
Color: 040 black, 043 carbon, 343 khaki
Size: Unisex
Weight: 170 g
Material: CORDURA® 700 den / T-Stretch

Universal underbelt for undercover deployments. The TT Secret Cummerbund is equipped for custom attachments using the MOLLE hook-and-loop panels and has elastic side pockets for pistol magazines or radio devices. It has hook-and-loop closures and can be adjusted for width with a bungee cord system.

[1] Length min. 95 cm - max. 115 cm / width 14 cm [2] Width adjustment by rubber lacing [3] Hook-and-loop closure [4] Four hook-and-loop surfaces (loop) on the outside [5] Eight elastic insert pockets, two of them with hook-and-loop patches inside [6] To be used for pistol and AR15 magazines

TT PLATE CARRIER LP

Item number: 7575
Color: 040 black, 331 olive, 346 coyote brown
Size: Unisex
Weight: 375 g
Material: T-Stretch / T-Square Rip FD

Extremely light panel carrier made of elastic materials and air-permeable mesh. The carrier is designed as an under-carrier. The elastic side sections include pouches for two magazines, radio or small items. No attachments on front. The size is designed for standard SAPI panels up to 30 x 25 cm. Due to its design as an „under-carrier“ and the associated choice of material, the plate carrier is not suitable for everyday infantry use.

[1] Length-adjustable elastic side attachment [2] Ultra flat construction [3] Small pocket with hook-and-loop closure on the front [4] Suitable for SAPI panels up to size 30 x 25 cm [5] Hook-and-loop patch on front- and backside (loop) [6] Shoulder straps of min. 26 cm to max. 36 cm adjustable

TT PLATE CARRIER QR SK ANFIBIA

Item number: 7895

[1] Best RFID scan protection with TÜV certified RFID blocking material CRYPTALLOY® [2] Shielding against all frequencies and can be used for all cards

TT CARD HOLDER RFID B

Item number: 7855
Color: 040 black, 331 olive
Size: 9,5 x 6 cm
Weight: 15 g
Material: T-Square Rip Light / CRYPTALLOY®

Foldout sleeve with RFID reader protection for at least four credit cards, bank cards, key cards or ID cards in credit card format.

[1] Best RFID scan protection with TÜV certified RFID blocking material CRYPTALLOY® [2] Shielding against all frequencies and can be used for all cards, [3] Space for at least four cards [4] Elastic strap closure

RFID readers are small, easy to obtain and – with the right criminal energy – to manipulate. As the radio waves pass through a large number of substances and materials, it is possible for data to be stolen “in passing”.

Possible consequences:
identity theft, loss of credit, exposure of behaviour and movement profiles, unauthorised access to business and/or private premises, etc.

TASMANIAN TIGER uses **Cryptalloy®**, a special metal alloy made by Krypton Technologies of Munich, for its RFID Block products. Compared with regular metallised foils, coatings and fabrics of the same strength and flexibility that still allow a proportion of the radio frequency through, **Cryptalloy®** almost completely blocks the signal (remaining signal no longer measurable). **Cryptalloy®** has been tested by SGS/TÜV Saarland Foster GmbH, and is confirmed and certified as suitable for screening against the unauthorised reading of RFID chips (including remote chips, NFC) on commercial frequencies 125 kHz, 13.5 MHz and 900 MHz. What is significant is the protection on frequency 125 kHz. Protection against this frequency guarantees maximum protection against all the usual RFID frequencies.

CRYPTALLOY®
RFID DOCUMENT SAFE

TT WALLET RFID B

Item number: 7766

Size: Unisex
Weight: 30 g
Material: T-Microfleece 100D

Microfleece hat.

[1] Unisex size [2] Embroidered logo

SPARE PARTS

TT WEBBING STRAP 0,75 / 1 / 1,5 / 3 M

Item number: 7217 / 7218 / 7219 / 7220
Color: 331 olive
Size: 75 x 1,8 cm, 100 x 1,8 cm, 150 x 1,8 cm, 300 x 1,8 cm
Weight: 32 g / 36 g / 42 g / 84 g
Material: Polyester Webbing

Pack strap for minimising volume. This strap enables you to compress your luggage and save volume. Or the strap can be used to attach baggage to the outside of your rucksack.

[1] Length adjustable

TT CHESTBELT 20 MM / 25 MM

Item number: 7212 / 7213
Color: 040 black, 331 olive, 346 coyote brown
Size: 50 x 2 cm, 50 x 2,5 cm
Weight: 35 g / 40 g
Material: Polyester Webbing

Functional chest belt for ergonomic carrying. This accessory for compatible rucksacks is simply attached to the existing eyelets on the shoulder straps to add extra stability.

[1] Length adjustable

TT REEPSCHNUR / 20 M

Item number: 7885
Color: 040 black, 331 olive, 346 coyote brown
Size: 4 mm x 20 m
Weight: 135 g
Material: Nylon

4 mm cord, 20 m length.

WARNING: This item is not a safety product - not suitable for rock climbing!

TT HIP BELT 25 MM / 38 MM

Item number: 7240 / 7241
Color: 040 black, 331 olive, 346 coyote brown
Size: 110 x 2,5 cm, 110 x 3,8 cm
Weight: 50 g, 80 g
Material: Polyester Webbing

Functional waist belt for ergonomic carrying. This accessory for compatible rucksacks is simply attached to the existing eyelets at hip height to add extra stability.

[1] Length adjustable

TT SR 25 MOLLE

Item number: 7881
Color: 040 black, 331 olive
Size: 4,5 x 3,4 cm
Weight: 20 g (pair)
Material: Acetal

Side release buckle for horizontal and vertical fixation on any MOLLE system. [1] Sold in pairs [2] Suitable for 25 mm webbing

TT SR 25 V MOLLE

Item number: 7886
Color: 040 black, 331 olive
Size: 4,5 x 3,4 cm
Weight: 20 g (pair)
Material: Acetal

Side release buckle for vertical fixation on any MOLLE system. [1] Sold in pairs [2] Suitable for 25 mm webbing [3] For vertical use only

NEW

TT SR 25 SAFETY QA

Item number: 7278
Color: 040 black, 331 olive, 346 coyote brown
Size: 6 x 3,5 cm
Weight: 24 g (pair)
Material: Acetal

Strong, quick-release multipurpose buckles for vertical attachment to MOLLE systems and to the various gear loops.

[1] Sold in pairs [2] Suitable for 25 mm webbing [3] SR buckle (female) for hanging in MOLLE or loops

NEW
SR38 Dual

TT SR 25 / SR 38 / SR 38 DUAL / SR 50 DUAL

Item number: 7882 / 7883 / 7887 / 7884
Color: 040 black, 331 olive, 343 khaki
Size: 6 x 3,5 cm / 7 x 4,8 cm / 7 x 4,8 cm / 8 x 6 cm
Weight: 12 g / 22 g / 22 g / 34 g
Material: Acetal

Quick-release buckle for repairs and replacement, available in the sizes 25 mm, 38 mm, and 50 mm.

[1] Three sizes [2] Suitable for 25 mm webbing (SR 25)

TT CARRYING STRAP 50MM

Item number: 7210
Color: 040 black, 331 olive, 346 coyote brown
Size: 120 x 5 cm
Weight: 130 g
Material: CORDURA® 700 den, Polyester Webbing

Padded shoulder strap. The length of the shoulder strap can be individually adjusted and is very comfortable to carry thanks to the sewn-in shoulder padding.

[1] Size adjustable carrying strap with shoulder pad [2] Secret pocket under hook-and-loop patch, e.g. for coins [3] Includes two metal snaphooks [4] NON-slip material [5] Hook-and-loop surface (loop) for patches etc.

TT SHOULDER PAD 50 MM

Item number: 7211
Color: 040 black, 331 olive, 346 coyote brown
Size: 27 x 7 cm
Weight: 40 g
Material: CORDURA® 700 den

Shoulder pad to make carrying heavy loads easier. Absorbs the load transfer on the shoulder and fits on a strap up to 5 cm wide.

[1] Extra shoulder cushion for heavier loads [2] Secret pocket under hook-and-loop patch, e.g. for coins [3] NON-slip material [4] Hook-and-loop surface (loop) for patches etc.

FAIR & TRANSPARENT PRODUCTION

TRANSPARENCY INSPIRES TRUST

Tasmanian Tiger products are made to European manufacturing standards under high social conditions at our own factories in Vietnam. You are very welcome to visit our factory Mountech Co. Ltd. on any Friday and experience how it operates.

www.openfactory.tatonka.com

MATERIAL OVERVIEW (Selection of materials)

CORDURA® 500 DEN (100% polyamide). Made from INVISTA high tenacity, air-jet textured nylon 6.6 in 500 denier. The CORDURA® brand provides fabrics that are recognized for their long-lasting durability and resistance to abrasions, tears and scuffs; they are more durable than other fabrics. CORDURA® fabric offers a superior strength-to-weight ratio, making it a first-choice for durable fabrics.

CORDURA® 700 DEN (100% polyamide). CORDURA® in fibre thickness 700 den combines the high wear and tear resistance of the classic 1000 den fabric with the lightness of the 500 den fabric.

CORDURA® WITH IRR PROTECTION Tasmanian Tiger manufactures tactical equipment in the color stone grey olive with certified IRR treatment. Both the European CORDURA® materials as well as webbing, hook-and-loop fasteners and buckles meet the high German Bundeswehr standards TL 8305-0278 and TL 8305-0281 with regard to the IRR camouflage effect (IRR 650 - 1250nm / 10 - 42%).

The Japanese company **YKK** is the global leader in zipper manufacturing and has a vast array of products in its range. Tasmanian Tiger has used YKK zippers for many years in its collection, in particular the tear-resistant YKK zippers with RC (Racquet-Coil) technology.

The YKK Fastening Products Group is trusted worldwide for impeccable production standards and thorough quality control processes.

The South Korean plastic buckle manufacturer, Woojin, operates a production site in Vietnam, which means resource-friendly transport distances between our facilities. Woojin and Tasmanian Tiger have been working together for so many years we're almost like family. The relationship includes not just development coordination but also exclusive fabrication. Tasmanian Tiger uses **WOOJIN** components throughout its entire range of products.

The side release buckles, zipper pulls, etc. made by **WOOJIN** have inspired top designers worldwide to innovate the next generation of tactical products.

200 DEN POLYESTER PU (100% polyester). Lightweight, strong Oxford fabric in 200 den polyester yarn with triple PU coating.

420 HD NYLON (100% polyamide). The classic 420 den Nylon material has proved itself in the „high density“ (HD) version as a good, very flexible basic material. The 420 den yarn gives it a very high tear resistance. The material is made waterproof by the triple PU coating.

TEXTREME 6.6 (100% polyester). The textured polyester material in 600 den threads is robust, colorfast and versatile. PU-coated to achieve a weatherproof finish.

CRYPTALLOY® (aluminium alloy). Screening products with the specially developed tear-resistant material CRYPTALLOY® offer the highest level of protection against RFID/NFC attacks. The TÜV certified material blocks radio waves on all the usual RFID frequencies and can be used for all cards.

110DTEX PA6.6 SILICON (100% polyamide). Lightweight, double-sided silicone-coated and printed Nylon fabric in 5-color camouflage. The material according to TL 8305-0278 is used for rain covers.

T-COVER TEX (100% polyester). This very light, waterproof material made out of polyester is pleasantly soft to the touch, and is used mainly for rain ponchos, rain covers and stuff bags.

T-SOFTSHELL 3L (Outer layer: 100% Polyamide, inner layer: 100% polyester, membrane: 100% polyurethane). This technical 3-layered Softshell material has a polyamide outer and a soft micro-fleece inner side, is wind- and water repellent as well as breathable.

T-Vent 3L (Outer layer: 92% polyamide, 8% elastane, inner layer: 100% polyamide, membrane: 100% polyurethane). This robust, elastic, wind- and waterproof 3-layered material is used for high-quality hardshell jackets. This ultrathin non-porous membrane is extremely waterproof and offers a high air permeability and stretchability.
